

# The Nature of Science

UnderCurrents

Volume 8 \$6

Founded in 1988, *UnderCurrents* is an independent non-profit journal dedicated to the publication of critical work in the broad field of environmental studies. Produced by graduate students at the Faculty of Environmental Studies, York University, the journal publishes work by writers from a wide variety of experiential and academic backgrounds. The journal seeks to make explicit and contest the destructive political and cultural conceptions of natural and built environments that have precipitated the contemporary ecological crisis.

See the inside back cover for information on guidelines for submissions.
